

Case Study: Synthetic Identity Fraud

Case ID: CASE-001

Date: July 2025

1. Summary

A synthetic identity was created using a valid Social Security Number combined with fabricated personal details. The fraudster built credit over 18 months before executing a series of high-value purchases.

2. Indicators

- Multiple new accounts opened within 30 days
- Rapid credit utilization increase
- Transactions from multiple states within hours

3. Resolution

The fraud was detected after a sudden \$12,000 purchase attempt. The account was frozen and escalated to the fraud investigations team.

4. Lessons Learned

Behavioral monitoring must be applied even to new accounts.

End of Case Study.
