

Case Study: Cross-Border Transaction Fraud

Case ID: CASE-002

Date: October 2025

1. Summary

A customer's card was compromised, resulting in unauthorized transactions originating from three different countries within a 24-hour period.

2. Indicators

- Transactions from high-risk countries
- Unusual spending categories
- Device fingerprint mismatch

3. Resolution

The fraud detection system flagged the activity with a score of 0.92. The card was immediately blocked, and the customer was contacted.

4. Lessons Learned

Geo-velocity checks must be enforced for all card transactions.

End of Case Study.
