

Customer Identity Verification Policy

Version 2.1

Effective Date: March 2026

1. Overview

This policy establishes identity verification requirements for onboarding and high-risk transactions.

2. Identity Verification Methods

Acceptable verification methods include:

- Government-issued ID
- Biometric verification
- Two-factor authentication
- Knowledge-based authentication

3. High-Risk Scenarios

Enhanced verification is required when:

- The transaction amount exceeds \$5,000
- The login originates from a new device
- The customer profile shows unusual behavior

4. Documentation Retention

Verification records must be retained for 7 years.
